Naki Mezőgazdasági Zrt.

"I farm an area of 2,000 ha. After spring, we tried UMG MICRO also in the autumn plantations and their stimulating effect is obvious. Within one plot I could also compare its effect with that of other products and the difference was evident... In summary, I think I can just recommend trying Fertilía's products."

**Hubay Árpád** – president –  
Hernádvölgye Mg. Associative

"We have been a stable partner of Fertilía for years. We keep buying their fertilizers. This year we set up an experiment with 40 ha of sunflower. We wondered what result the UMG MICRO Helia-Start plant-specific micro-granulate would bring. Its yield increasing effect was verified for it produced 0.9-1 tons average extra yield compared with the control area."

## UMG MICRO

Micro-granulate starter  
fertilizers family

*...for making our plant  
grown be the winner of  
the vegetation race!*

2013

AGROMashEXPO  
Diploma for Product  
Development 2014

**fertilía**

Tailor-made fertiliser from Hungarian manufacturer

**fertilía**

Tailor-made fertiliser from Hungarian manufacturer

The **plant-specific UMG MICRO micro-granulate starter fertilizers family** is a new generation of micro-granulates, which, besides their complex active agents – **macro-elements, organic chelate-binding micro-elements** – uniquely **also contains** organic material **the Rizodyne soil activator as well.**

- For corn **UMG MICRO ZeaStart**
- For sunflower **UMG MICRO HeliaStart**
- For cereals **UMG MICRO TriticaStart**
- For rape **UMG MICRO BrassicaStart**
- For sugar beet **UMG MICRO BetaStart**

**UMG MICRO StarterMax** with excellent-price-value rate is for general arable field and horticultural use. Within the same action of sowing, it can be applied in small dose directly along with the seeds by the help of a micro-granulate spreading adapter installed on the sowing machines.

The UMG MICRO is a HUngharian-made and developed fertilizer holding the Hungarian Product Award.

**What result does its application provide?**

- ✓ **Dynamic rise and germination**
- ✓ **Well-developed, strong, healthy and homogenous plantation**
- ✓ **It quickly grows out of the teeth of harmful insects**
- ✓ **High resistance to diseases (fusarium)**
- ✓ **The winner of the vegetation race is the plant grown**

**Rizodyne soil activator sparkles up the life in the soil with a range of organic and mineral active agents therefore, the given plants absorb nutrients easier and in higher content!**
